

CRIME MAPS MADE MOBILE

Daytona Beach residents can now take their neighborhood's crime stats with them wherever they go thanks to a new iPhone application (app). The recently released app is the only mobile app to feature official, up-to-date crime data directly from more than 600 law enforcement agencies across North America as well as sex offender data for all 50 states. The app is free to download from the iTunes App Store. Through its partnership with CrimeReports, the largest online resources for crime and sex offender information, the Daytona Beach Police Department already publishes their crime data online. To see the online reports, please [click here](#).

The CrimeReports iPhone app allows users to:

- Filter data by location or address, incident type and customizable date range
- View recent neighborhood level crimes on the map or in a list
- View national sex offender data alongside crime in your neighborhood
- Sign-up for free, automated, email crime alerts

The CrimeReports team is also currently planning similar apps for other mobile platforms. You can find out more about the new CrimeReports iPhone app by visiting www.CrimeReports.com/iphone.
